VETERINARY REFERRAL HOSPITAL OPENS IN NORTHWEST VALLEY

Medical choices for pets have increased as quickly as those for their human owners. As scientific advancements in veterinary medicine keep pace with that of human medicine and as veterinary specialists enter private practice at a rapid pace, pet owners have increased access to state-of-the-art veterinary care for their pets. As the human-animal bond continues to grow across America, pet owners are committed to providing the best health care available for their special companions. Now a 6,600 square foot veterinary referral hospital with the latest in veterinary technology has opened at 6677 W. Thunderbird Road, Glendale, Arizona to serve dedicated pet owners in the Phoenix metro area.

The Southwest Veterinary Referral Center (SVRC) is an alliance of veterinary specialists that have joined together to establish a referral hospital that focuses on providing veterinary care for complicated or extensive medical conditions of companion animals. Some of the specialized medical and surgical services offered to pets include total hip replacements, neurosurgery, orthopedics and fracture repair, joint arthroscopy, chemotherapy, cancer immunotherapy, pain management consultations, preanesthetic evaluations by our board-

certified anesthesiologist, anesthetic management of high risk and critical care patients, ultrasonography, and digital radiography.

Each specialty practice in our facility is highly esteemed in the veterinary community and offers advanced diagnostic and therapeutic procedures. Many of the practice owners are nationally recognized leaders in their fields. The specialists hold positions of leadership in numerous specialty colleges and organizations, lecture throughout the world, publish textbook chapters and other refereed articles, and conduct clinical trials that further the knowledge of the veterinary profession.

Much like a human hospital, SVRC provides treatment for pets with complex medical and surgical problems. SVRC is an extension of veterinary practices throughout the valley, working in conjunction with referring veterinarians to provide comprehensive patient care and exceptional client service. Our services provide a comprehensive array of services to ensure the health of an important part of the family: pets. “As far as convenient, comprehensive specialty pet care, the northwest valley was underserved,” says Laura Bone, DVM, MBA, and Executive Director of the surgery practice located at SVRC. “Now clients have the convenience of finding top-notch specialists under one roof. This is important because many of these specialists routinely collaborate on complex medical and surgical conditions referred by veterinarians. Having caring specialists conveniently located in a modern, comfortable environment makes the experience more pleasant for both the patient and the client.”

Patients will come to the new facility on the southeast corner of 67th avenue and Thunderbird Road in Glendale as referrals from their primary care veterinarian. “Our mission is to provide compassionate, convenient, and comprehensive care to all of our patients,” Bone added. “Pets are family.”
